DIAGRAM

KEY KNOWLEDGE

To become familiar with common names of flowers, examples of deciduous and evergreen trees.

To understand the structure of plants (including leaves, flowers (blossom), petals, fruit, roots, bulb, seed, trunk, branches, stem)

To gain an understanding that plants need water, sunlight, the right temperature and air to grow.

DIAGRAM

Wild Plants

Things to talk about at home

- Plant seeds and watch their plants grow
- Go for a walk and help them to identify the different trees and flowers that they see
- Compare different trees and decide whether they are deciduous or evergreen
